

SEAHAM NORTH DOCK - NORTH EAST BUILDING OF THE YEAR

RO-BAL Steel Fabrications Limited worked with Napper Architects on Seaham North Dock, which has just been awarded RIBA North East '*Building of the Year*'. RO-BAL installed polished stainless handrails, glass and louvered screens.

The building sits confidently in its waterfront environment. It has great clarity in its simplicity and detail and reflects modest maritime references in its ship-like linear form and its 'prow' which provides a glazed cafe and terrace facing south west to the outer harbour and the open sea.
